Managing Your Money:

A Guide to Financial Literacy for Secondary Students

This book outlines and provides practice in many essential skills that young people need to achieve greater confidence and independence in financial matters.

To be financially literate is to learn about money – how to handle it, how to make it work in a positive way, and importantly, how to develop a regular habit of saving and how to begin investing.

Each section of the guide provides valuable information about using money in the real world. This knowledge is applied in the **ACTIVITY** sections so that students can practise realistic tasks in money management.

A regular savings habit as well as basic knowledge about investing is integral to the concept of financial literacy in this book. Managing money responsibly and ethically is also emphasized.

The last sections of the guide focus on ways of building wealth, moving beyond basic money management to a higher level of financial literacy in relation to investment and financial independence.

Managing Your Money: A Guide to Financial Literacy for Secondary Students is a valuable resource for secondary school students during their school lives and beyond, into adulthood.

FEATURES:

- Appropriate terminology and language level for secondary students.
- Key terms (in bold) are defined and are reproduced in a glossary
- Practical activities throughout the book
